

PER IMAGE · always executed

PER DEVICE · measured once

complete route cost $C_h(\ell)$, ms				
AGX Xavier TensorRT FP16	1.8	4.2	9.4	19.5
Hailo-8 INT8 HEF	44.3	58.1	76.2	116.3

--- budget B_h

static deployment cost $S_h(\ell)$:
engine only, no probe

probe + decision + switch + engine,
pre-processed tensor → synchronized output

Legend:

- compiled static engine (Tiny / Small / Medium / Large)
- image, segmentation or entropy map
- data path at inference
- score and decision flow
