

From one raw image to a budget-feasible static segmentation

(d) Visual-risk signal

(a) Raw input

(b) Tiny input

resize + normalize · 384x192

(c) Tiny probe

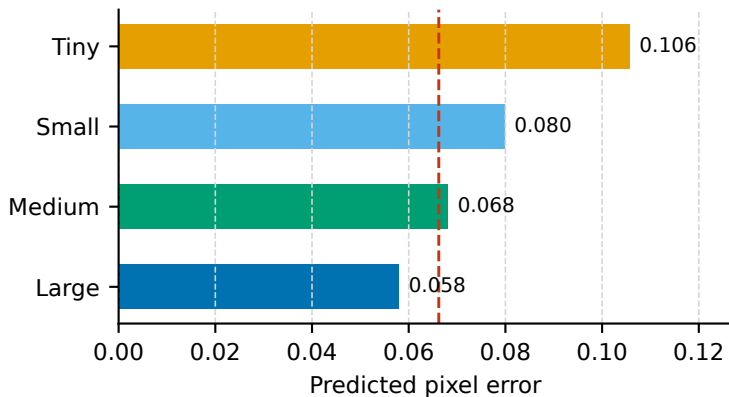

mean entropy

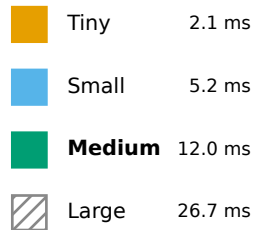

0.461

(e) Candidate-specific expected error

candidate risks + measured route costs

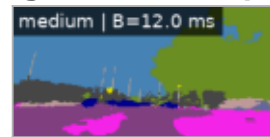

(f) Budget-feasible set

budget = 11.97 ms

(g) Selected output

Medium
